## Summary

Hello, I'm a hybrid mobile app and web developer specializing in React Native. With experience building projects such as Uber clones, food delivery apps, and e-commerce websites, I've developed a deep understanding of what it takes to create scalable and efficient applications using JavaScript, Node.js, and MongoDB.

I'm also proficient in Redux, a popular state management library for JavaScript applications, including React and React Native. Additionally, I have experience working with RESTful APIs, Git, and other development tools.

Currently, I'm working as a Mobile Developer at O hi app, where I'm responsible for building and maintaining their React Native mobile app. I enjoy using my skills to build products that make a difference in people's lives.

If you're looking for a developer who can create mobile apps and web applications using React Native, Node.js, and MongoDB, I'm here to help. Please feel free to check out my portfolio website at <https://umeshbhati.netlify.app> to see some of my recent work and get in touch if you'd like to learn more about how I can help you build your next project.

## Experience

### Software Developer

O hi

Apr 2022 - Present (1 year 1 month)

Build and maintain React Native mobile app for early-stage startup

Develop custom UI components and implement complex business logic

Collaborate with backend developers to ensure seamless integration with RESTful APIs

Work closely with product management team to understand user needs and refine product roadmap

Participate in agile development process, including sprint planning, daily stand-ups, and retrospectives

### Mobile Developer

Kpcod

Aug 2020 - Mar 2022 (1 year 8 months)

Develop and maintain React Native mobile apps for clients across various industries, including finance, transportation, and media

Work collaboratively with UX/UI designers to create visually appealing and user-friendly interfaces

Implement features such as payment processing, location-based services, and social media integrations

Write clean and maintainable code using best practices and coding standards

Troubleshoot and debug issues to ensure app stability and performance

## Education

**ARYA INSTITUTE OF ENGINEERING TECHNOLOGY AND MANAGEMENT**

## Licenses & Certifications

**JavaScript Algorithms and Data Structures** - freeCodeCamp

**Responsive Web Design** - freeCodeCamp

**Learn to Build MERN Stack Mobile App with React-Native** - Udemy

**Responsive Web Design** - freeCodeCamp

## Skills

TypeScript • Tailwind CSS • Mongoose ODM • redux • MongoDB • Express.js • Node.js • Git •  
GitHub • React Native
